

Assignment: 13

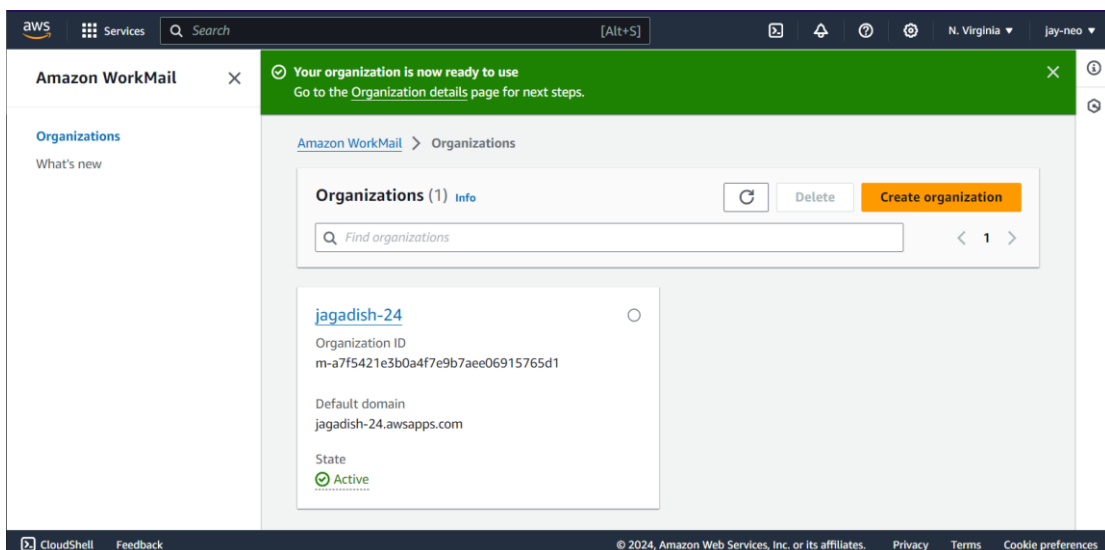

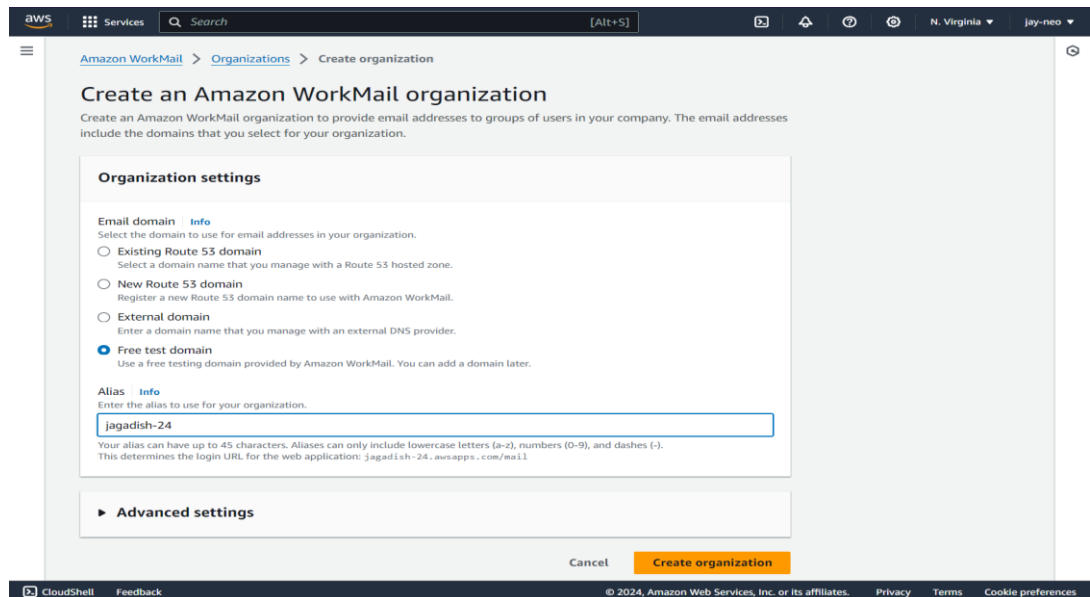

Problem Statement: Create a Work-Mail for your Organization.

Procedure:

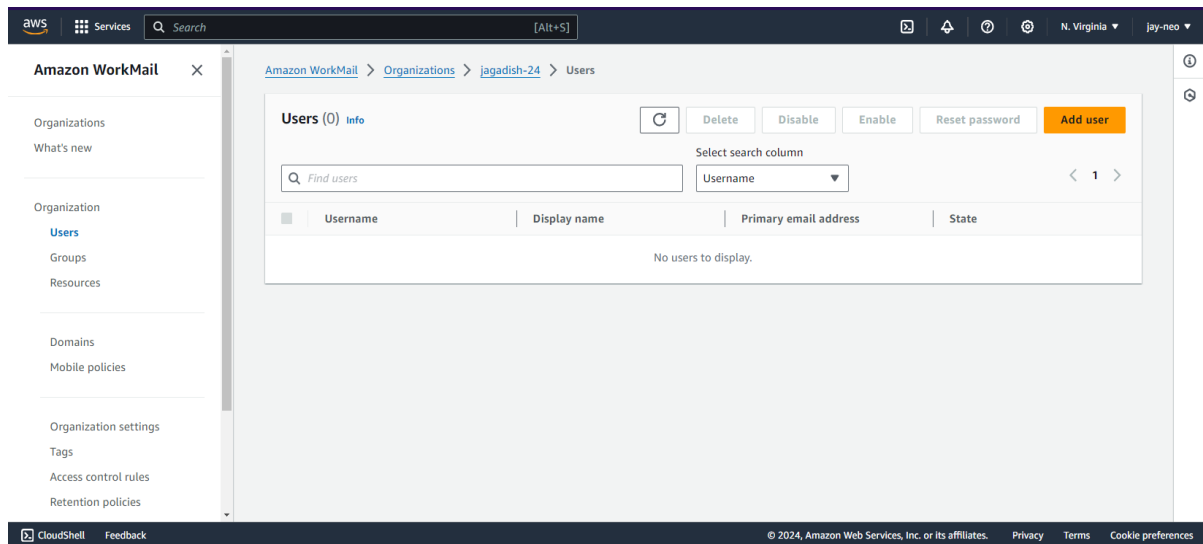

Step 1: Open Amazon Work-Mail. Click on Create organization.

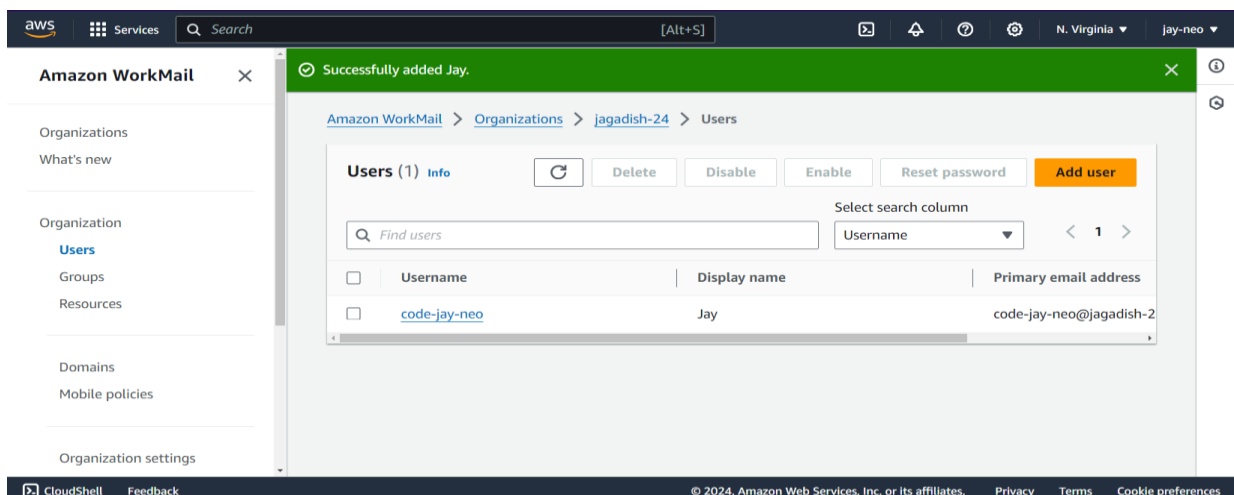

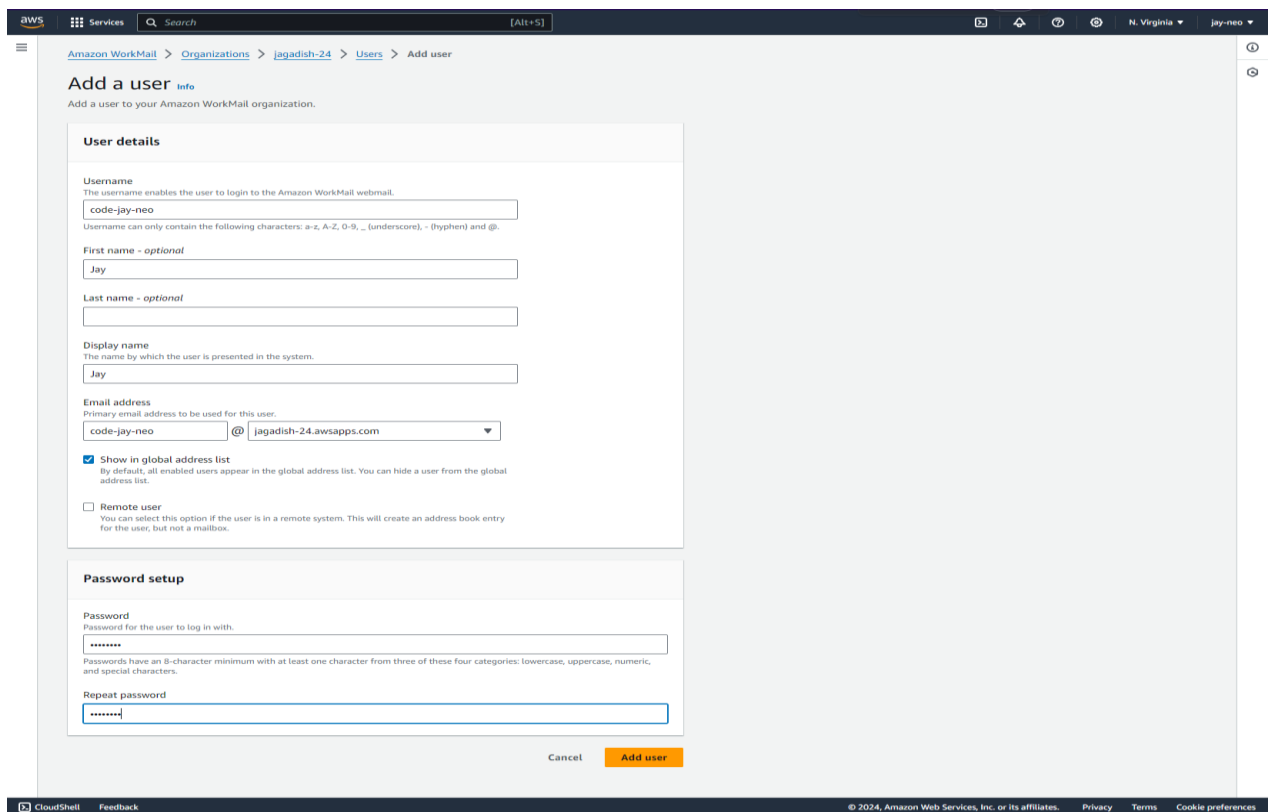

Step 2. Under Organization settings select Free test domain and enter Alias and click Create organization.

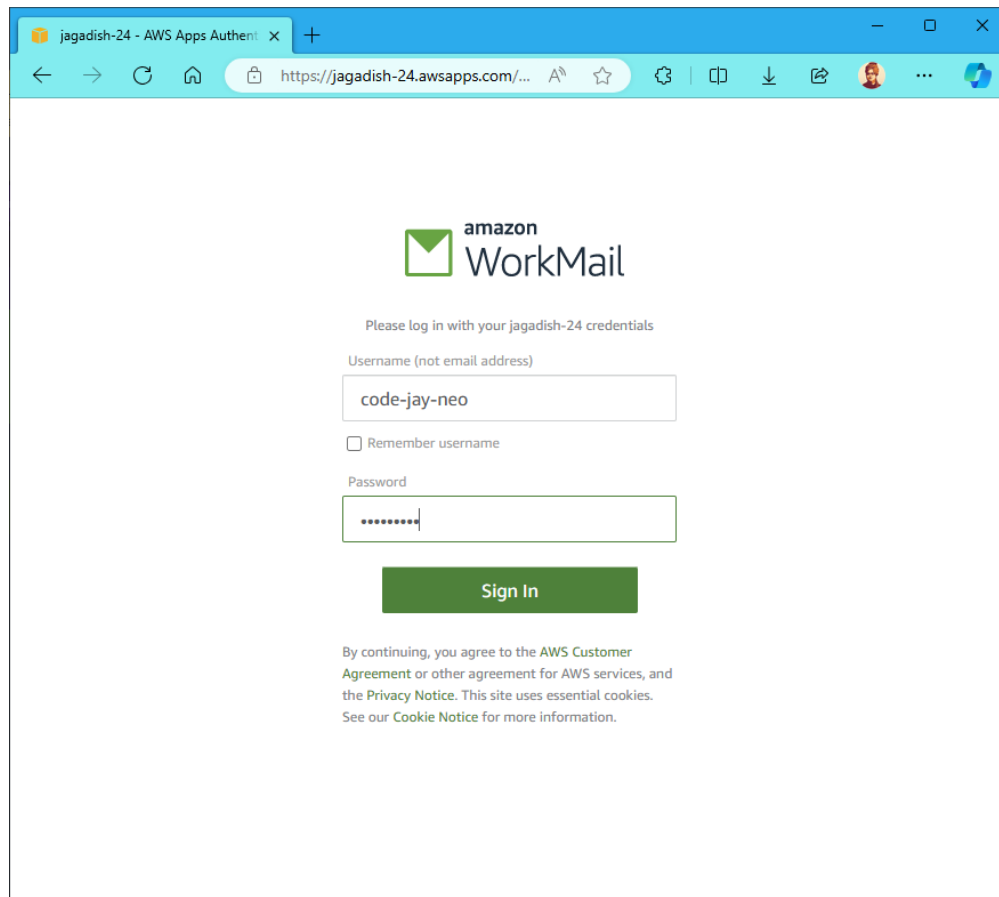

Step 3. Click on the organization created. In the left pane go to Users and click Create user.

Step 4. Enter the User details (Username, First name, last name). Under Email setup, set a password and create user.

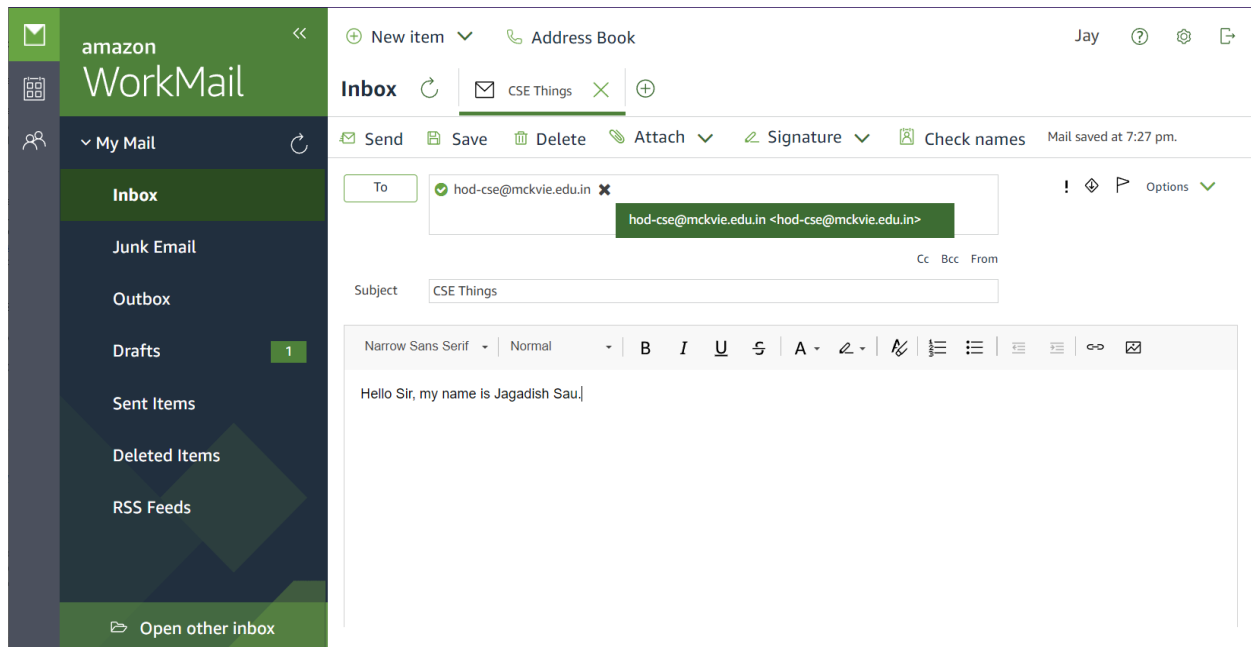

Step 5. Now go to Organizations, select the organization created and open it with the Amazon Work-Mail web application link and Sign In using username and password.

The screenshot shows a web browser window with the URL `https://jagadish-24.awsapps.com/...`. The page displays the Amazon WorkMail logo and a login form. The form prompts the user to log in with 'jagadish-24' credentials. The 'Username (not email address)' field contains 'code-jay-neo'. There is a checkbox for 'Remember username' which is unchecked. The 'Password' field is masked with dots. A green 'Sign In' button is located below the password field. At the bottom, there is a disclaimer: 'By continuing, you agree to the AWS Customer Agreement or other agreement for AWS services, and the Privacy Notice. This site uses essential cookies. See our Cookie Notice for more information.'

Step 6. WorkMail is ready to send and receive messages.

The screenshot shows the Amazon WorkMail web interface. On the left is a navigation sidebar with icons for Mail, Calendar, and Contacts, and a list of folders: 'My Mail' (expanded), 'Inbox', 'Junk Email', 'Outbox', 'Drafts' (with a count of 1), 'Sent Items', 'Deleted Items', and 'RSS Feeds'. At the bottom of the sidebar is a link to 'Open other inbox'. The main area shows the 'Inbox' with a list of messages. The selected message is from 'hod-cse@mckvie.edu.in' with the subject 'CSE Things'. The message body contains the text 'Hello Sir, my name is Jagadish Sau.' The interface includes various action buttons like 'Send', 'Save', 'Delete', 'Attach', 'Signature', and 'Check names'. The top right shows the user's name 'Jay' and settings icons.
