

Assignment 3

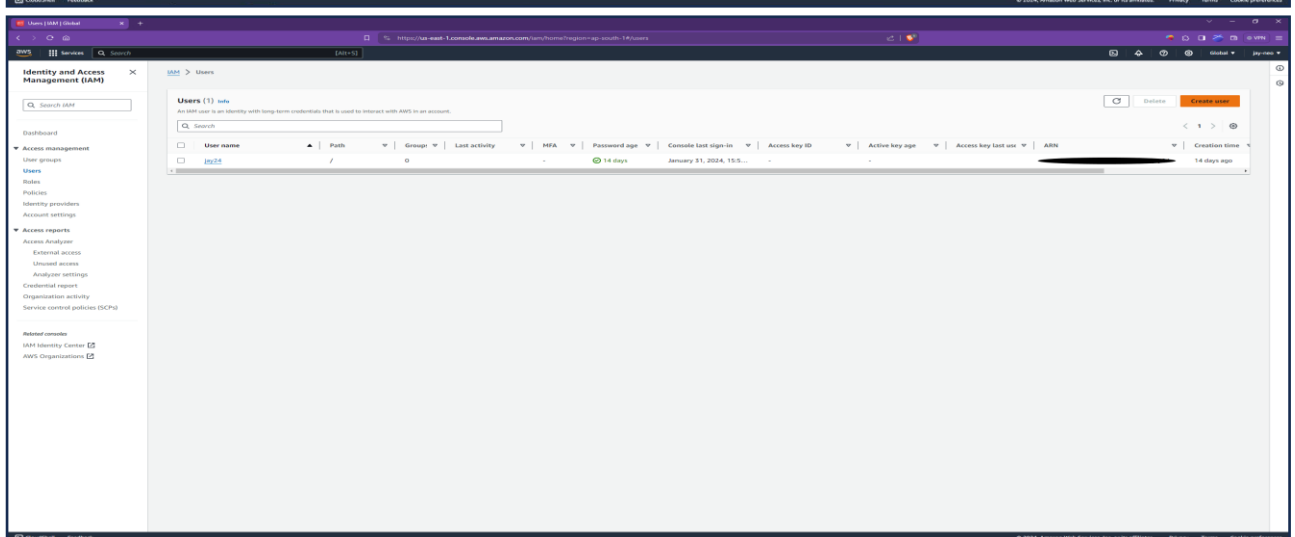

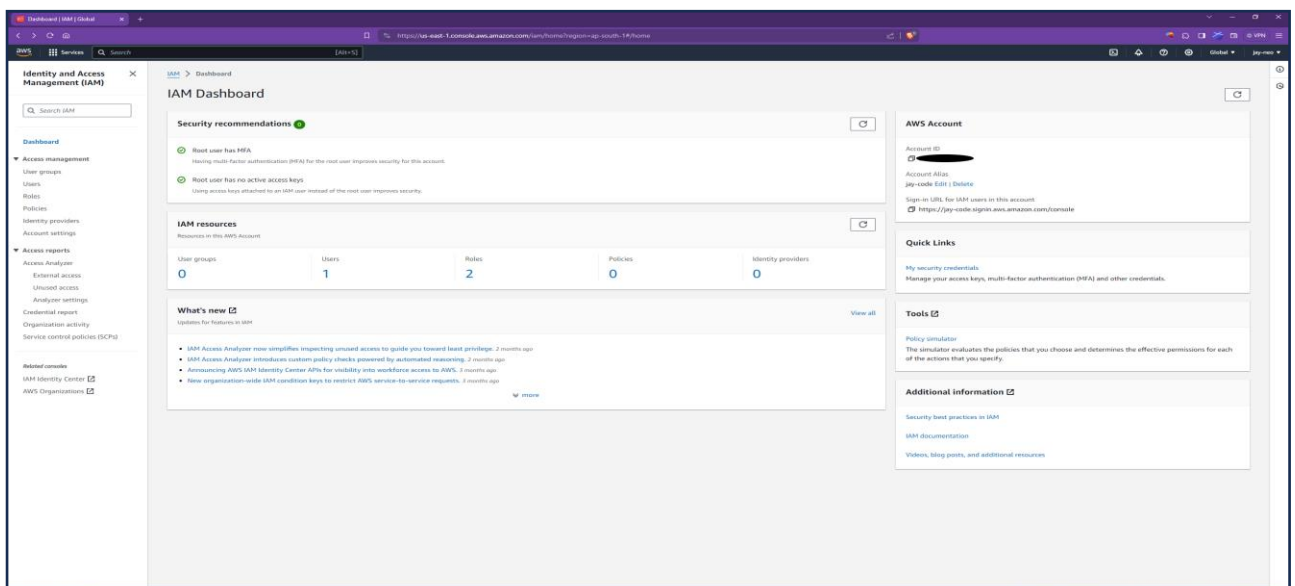

Statement: Create a new IAM user and give full access of S3.

Steps:

1. Search “IAM” in search bar

2. Select User and the Create User

3. Fill all the required details.

Specify user details

Step 1: Specify user details
Step 2: Set permissions
Step 3: Review and create
Step 4: Retrieve password

User details

User name: neo24

☒ Provide user access to the AWS Management Console - optional

Are you providing console access to a person?

User type:
☒ Specify a user in Identity Center - Recommended
☐ I want to create an IAM user

Console password

☐ Autogenerated password
☒ Custom password

Enter a custom password for the user:

☐ Require password reset at next sign-in - Recommended

☒ Attach policies directly

Cancel Next

4. Select “Attach policies directly” and give full access of S3 to User “neo24”

Set permissions

Add user to an existing group or create a new one. Using groups is a best practice way to manage user's permissions by job functions. [Learn more](#)

Permissions options

☐ Add user to group
☐ Copy permissions
☒ Attach policies directly

Permissions policies (1/1175)

Choose one or more policies to attach to your new user.

Filter by Type: All types 1 match

Policy name	Type	Attached entities
AmazonS3FullAccess	AWS managed	1

☒ Set permissions boundary - optional

Cancel Previous Next

5. Just see the review before creating new user “new24”

Review and create

Review your choices. After you create the user, you can view and download the autogenerated password, if enabled.

User details

User name: neo24
Console password type: Custom password
Require password reset: No

Permissions summary

Name	Type	Used as
AmazonS3FullAccess	AWS managed	Permissions policy

Tags - optional

Tags are key-value pairs you can add to AWS resources to help identify, organize, or search for resources. Choose any tags you want to associate with this user.

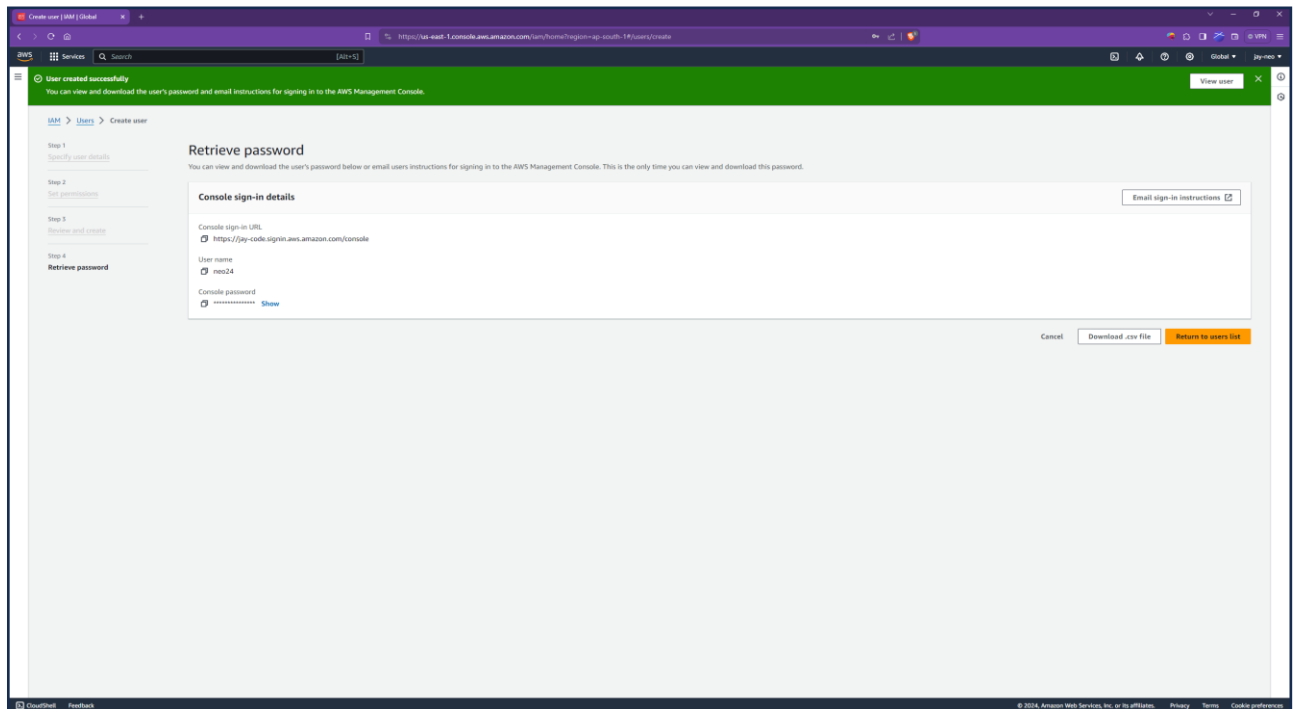

No tags associated with the resource.

[Add new tag](#)

You can add up to 50 more tags.

Cancel Previous Create user

6. Copy the sign-in URL or download .csv file for future login purposes from user side.

7. Finally, a new user “neo24” is created.
